

BUYING GUIDE • Can Liners

CHOOSE PLASTIC TYPE AND GAUGE

Low Density Bags (Low-D Bags)

Used for rough objects under tough transport conditions. These liners are very strong and more resistant to tearing, but handle lower load capacities than Hi-D liners. The thickness of low-density liners is measured in mils. One mil equals one-thousandth of an inch. In general the larger the waste can, the more mils needed for the liner.

Suggested Low-D Applications

- Sticks
- Plastic eating utensils
- Rough yard trimmings
- Abusive transport conditions
- Metal w/sharp edges
- Glass bottles
- Objects w/rough corners
- Food w/rough edges (crab legs)

Match Liner with your Can

High Density Bags (Hi-D Bags)

Used for paper and non-rough objects under moderate transport conditions. These liners are very strong and handle higher load capacities than Low-D liners, but are less resistant to tears once punctured.

The thickness of high-density liners is measured in microns. One micron equals one-thousandth of a millimeter. In general the larger the waste can, the more microns needed for the liner.

Suggested Hi-D Applications

- For office waste baskets
- Dirt, grass, rags
- Paper, paper plates/cups
- Cans without sharp edges
- Food without sharp edges
- Smooth heavy objects

GOOD'nTUFF

ultra PLUS

A Good'nTuff® Waste Can Liners Durable Econo Liners employ high-density resins for strong puncture resistance. Star bottom design distributes load evenly and helps prevent leaks. Small count, perforated rolls assist portion control. Translucent material allows end-user to easily identify bag contents for recycling or pilferage control.
