

BUYING GUIDE • Chairs

There are many features to consider when selecting the perfect chair to suit your needs. The following symbols will help you choose the features that are right for you. These symbols are used throughout the chair section of this catalog to help quickly identify each chair's features. The descriptions of the features shown are meant to be general explanations. The actual functions of the features may vary slightly among manufacturers.

Pneumatic Seat Height Adjustment
Quick and easy adjustment regulates height of chair relative to floor.

Back Height Adjustment
Simple lift motion positions lumbar support within a fixed range to alleviate back stress.

Seat Depth Adjustment
Positions chair back relative to seat, reducing pressure on the buttocks and thighs for both taller and shorter users.

Seat Glide Mechanism
Seat cushion travels forward and back, then locks into position.

360° Swivel
Chair rotates a full 360° in either direction for ease of motion. Standard on every executive and task chair.

Tilt
Pivot point located directly above center of chair base (white dot indicates pivot point).

Mid-Range Knee Tilt
Pivot point located slightly ahead of center of chair base (white dot indicates pivot point). Allows user to recline at a slightly more relaxed angle than conventional center tilt.

Knee Tilt
Pivot point located near front edge of chair (white dot indicates pivot point). Allows user to keep feet flat on floor while chair reclines.

Synchronized Knee Tilt
Back reclines at a 2-to-1 ratio to seat angle. Pivot point located near front edge of chair (white dot indicates pivot point).

Dual-Action Tilt
Back reclines at a 2-to-1 ratio to seat angle. Allows user to recline while keeping seat cushion relatively level to floor (white dot indicates pivot point).

Tilt Tension
Controls rate and ease with which chair reclines to different weight and strengths of users.

Tilt Lock
Locks out tilt function when chair is in upright position.

Posture Lock
Back angle adjusts independently of seat, and can be locked in an infinite number of positions within a fixed range.

Multi-Task Control
Adjusts seat and back angles with a single lever (infinite locking within a fixed range), reducing fatigue in back and thighs (white dot indicates pivot point).

Asynchronous Control
Three levers modify: angle of back relative to seat, tilt (free float or infinite locking within a fixed range), and forward tilt (for keyboard intensive applications).

Dual-Clutch Posture Control
Adjusts seat and back angles independently with two levers for infinite locking within a fixed range (white dot indicates pivot point).

Variable Synchro-Tilt
Back reclines at a 2-to-1 ratio to the seat. Chair can tilt freely, or lock in five positions (white dot indicates pivot point). "Forward angle" control provides an extra 6° in the range of motion.

Inverse Synchro-Tilt
With automatic tension control operation for better circulation, "Zero tilt" seat front helps keep feet on the floor when reclining. Tilt lever controls range of motion.

Independent Seat and Back
Seat and back flex independently for automatic comfort.

Integral Lumbar Support
Easily adjusts to enhance comfort (2 1/2" adjustment range).

Hip Pivot Motion
Seat remains stationary while the back adapts to body movement.
