

BUYING GUIDE • Floor Mat

Statistics prove that an effective matting system is essential to protect floors and carpets in your entire building. By purchasing the correct mats, you can reduce maintenance costs and improve building safety. Without adequate matting: Up to 24 lbs. of dirt can be tracked in by just 1,000 people in a 20-day work period; and 42% of floor finish can be removed within the first six feet of an entrance by only 1,500 people.

CHOOSE THE RIGHT SIZE:

A mat that is too small will not fix the problem area you are trying to improve; a mat that is too large may cause tripping. Also, consider the thickness of the mat. If it will be used in front of a door, what kind of floor clearance will the door require?

CHOOSE THE RIGHT TYPE:

Will the mat be located in a high-traffic area, a wet area, or used to protect equipment and floors in an office area? Will the mat be used to lessen the fatigue of workers who stand most of the day? We have mats that can help reduce stress on the body, and help reduce slips and falls in addition to wiper and scraper mats meant to catch dirt.
